DESCRIPTION OF MATERIAL								
<p>#1. Tapping the blast furnace. There are only two runners for the iron from the furnace, which would indicate that the furnace is small. Two 60-ton ladles are probably used for each five hour tap.</p> <p>#2. An interior view of the blast furnace cast house. Note the truss arrangement in the building.</p> <p>#3. Side of the blast furnace cast house, showing five cinder cars. <input type="checkbox"/></p> <p>#4. Finished tubular products. Note the rather heavy-walled tubes.</p>
